1.3. What's New In I57	5
2. Known Issues	6

1. What's New

These release notes are only available for Exabeam cloud-delivered offerings. Please contact Exabeam Sales or your account executive for additional information.

1.1. What's New in i59

1.1.1. GENERIC INCIDENT TYPE CUSTOMIZATION

Get more control over what information is displayed in every incident.

To ensure certain information is added to every incident, add custom incident fields to the *Generic* incident type. You can also customize the *Generic* incident type's layout to rearrange how the incident fields are displayed in the incident. You can't remove the default incident fields that come with the incident type.

1.2. What's New in i58

1.2.1. OUT-OF-THE-BOX INCIDENT TYPES FOR EXABEAM THREAT DETECTION, INVESTIGATION, AND RESPONSE (TDIR) USE CASE PACKAGES

Make your investigations more consistent and complete with new out-of-the-box incident types aligned with TDIR Use Case Packages: Compromised Insiders, Malicious Insiders, and External Threats.

Now, you can use an expanded collection of out-of-the-box incident types. These incident types ensure that you collect the appropriate evidence and define clear response plans for every use case.

Most incident types come with specific incident fields and tasks. You can edit the incident fields and tasks, rearrange them, or create custom incident fields and tasks for any out-of-the-box incident types to better suit your needs.
