5. Issues Fixed In Case Manager I54.7	8
6. Issues Fixed In Case Manager I54.8	9

1. What's New

This release does not include new features for Case Manager.

2. Known Issues

This release does not include known issues for Case Manager.

3. Issues Fixed in Case Manager i54.5 (General Availability)

SOAR-10161	If you receive email notifications for health alerts, you incorrectly received an email notification that incident email was not running, even if you never configured incident email. Now, the alert checks if incident email is configured before sending an email notification.
------------	--

SOAR-11802	If a log contained special characters, you couldn't create an incident for it because a regular expression function interpreted the characters in a way that threw an exception. This function has been modified so it replaces the special characters.
------------	---

3.1. Issues Fixed in Case Manager i54.5.1 (First Customer Shipment)

The i54.5.1 release does not include fixed issues for Case Manager.

3.2. Issues Fixed in Case Manager i54.5.2

EXA-32163	Some Case Manager pages were vulnerable to cross-site scripting attacks, which used specially crafted event logs to execute scripts. This issue has been resolved.
-----------	--

4. Issues Fixed in Case Manager i54.6

SOAR-11797 When you created a custom incident field with the **Dropdown** type and selected **Allow multiple values**, you encountered an error. Now, **Allow multiple values** is disabled for the **Dropdown** type.

To list multiple values for any custom incident field type, select **List predefined options**.

If you can enter or select multiple values from this list, select **Can enter or select multiple values**.

5. Issues Fixed in Case Manager i54.7

The i54.7 release does not include fixed issues for i54.7.

6. Issues Fixed in Case Manager i54.8

The i54.8 release does not include fixed issues for Case Manager. The following sections describe issues fixed in patch releases.
